

FreePeng Whitepaper v1

More Than a Meme. Built by the Community.

Overview

FreePeng is an original penguin-themed meme token project designed around community, transparency, and public development. The project will be tested before any mainnet deployment.

Story

FreePeng is a fictional penguin mascot that breaks its chains and carries an icy blue crystal as a symbol of community freedom, creativity, and building together.

Tokenomics

Planned token details: Name FreePeng, Symbol FPG, Network BNB Smart Chain, Supply 1,000,000,000 FPG, Tax 0% buy and 0% sell.

Roadmap

Phase 1: brand, website, GitHub. Phase 2: smart contract and testnet. Phase 3: mainnet and PancakeSwap liquidity. Phase 4: community growth and listing preparation.

Security

The official contract should be based on standard ERC-20 tooling and verified publicly before mainnet use. Testnet deployment and transfer checks should be completed before launch.

Risk Notice

FreePeng is not financial advice. Meme tokens are highly risky and volatile. No profit is promised or guaranteed. Users should do their own research and never risk money they cannot afford to lose.

Community

FreePeng aims to grow through transparent updates, open development, and community-driven decisions over time.

Item	Value
Name	FreePeng
Symbol	FPG
